

## *Whose perspective?*

On each ray, add whose perspective the various depictions represent (ie. male, Western, etc).  
Add more rays if needed.

## *Quality of (mis)representation*

Some rays are labelled to help you get started. Others are left blank for you to label (ie. homophobic, ableist, etc).  
Each time you come across a certain category of representation, fill in one square off the ray of its category.  
For example, each time you come across a sexist representation, fill in one square off the *Sexist* ray.  
If you run out of squares or rays, add some yourself.
